The Liv® is a simple, patented, FDA-cleared medical device that makes clinical and breast self-examinations effortless and more comfortable.

The Liv® comes in the form of a soft, heart-shape designed pad filled with a non-toxic lubricant.

The Liv® reduces the friction between the fingers and the breast for ease of movement of the fingers over the breast.

The Liv® is so easy to use and gentle to the touch, that it encourages women to perform regular self-breast examinations.
